The U.S. lift Truck division based in Cleveland has a expert team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Originally the domestic forklift marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled forklifts as part of a domestic machinery expansion project. Sales of these goods were originally targeted to state-run firms, large scale corporations, and the military. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical training became the new focus for enhancing quality and product development.

Daewoo started the first home-based forklift business in 1967, and quickly gained a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's superior technological enhancements combined with sales success placed them in a situation of substantial growth of their lift truck operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative enterprise project to counter act competitive pressures in the US materials handling industry. This project radically expanded Daewoo's forklift sales. Construction was finished in 1984 to facilitate a modern plant which helped launch the company for the manufacture of high added-value goods suitable for export. In 1993, the corporation had a international sales system and started exporting models they had developed through in-house technology, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas markets.
